

Envelope Approximation vs FDFD | Honeycomb TM | $\theta = 1.12^\circ$ | $(m,n) = (30,29)$

Each envelope mode matches an FDFD mode to 0.5% of envelope bandwidth

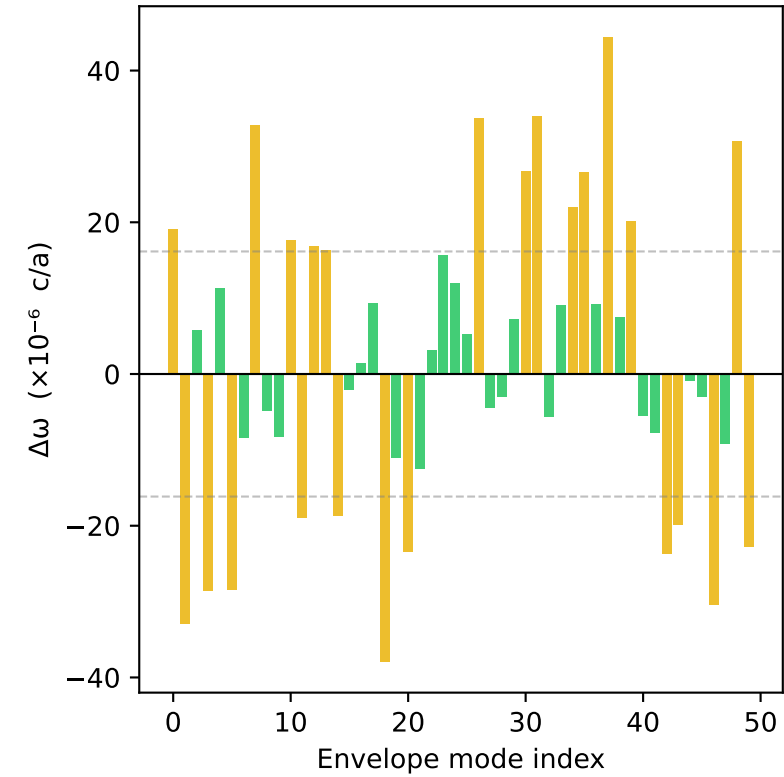

(a) Level diagram + matching

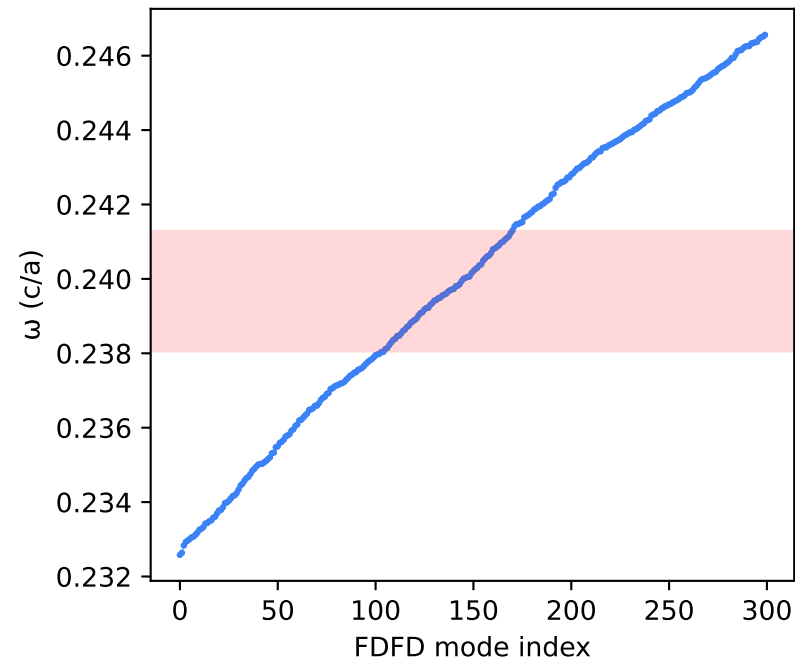

(b) 1:1 frequency match

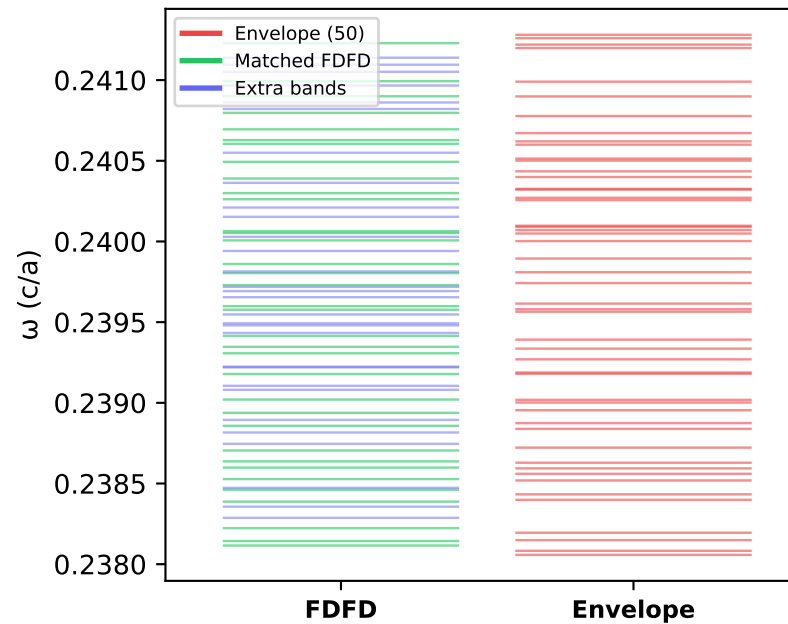

(c) Residuals: mean = 16×10^{-6}

(d) Full FDFD spectrum

(e) 35 matched + 30 extra FDFD

(f) DOS (different N_modes)
